## **OFFICE ACTION**

### ***Response to Arguments***

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30, 54, 57 are rejected under 35 U.S.C. 102(b) as being anticipated by Young (3626319). Fig.1-3 and entire document disclose “isolating said fiber laser in a temperature-controlled enclosure from an external environment; and operating the fiber laser within the enclosure while utilizing the enclosure to stabilize a repetition rate of the fiber laser”.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 58 is rejected under 35 U.S.C. 103(a) as being unpatentable over Young (3626319) in view of Tumminelli et al. (5166940). Young disclose all limitations of the claim except for the PZT transducer.

Tumminelli teach the PZT transducer.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Young what is taught by Tumminelli to control the fiber laser performance (meaning control the rep. rate) col.5, l.20-30.

#### ***Allowable Subject Matter***

Claims 31-32, 34, 36, 55, 59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
